GET BETTER SLEEP, NATURALLY?

If drifting off to la la land naturally sounds like something you'd dream about (...if only you could sleep) then we have something for you! But first a little science.

You're probably already familiar with Cannabidiol, or CBD. It's one of the more popular cannabinoids found in the cannabis plant. CBD does not cause the euphoric effects or "high" associated with other cannabinoids, like THC.

You might not be as familiar with Cannabinol, or CBN; another cannabinoid in the cannabis plant. It's similar to CBD, but its origin is different—it's actually the product of oxidization. It's been said that CBN promotes a more sedate feeling, which may help you sleep better.

Both CBD and CBN interact with the body's endocannabinoid system. One study found that they had an analgesic effect in animals, reducing pain related to chronic pain disorders, like fibromyalgia. **Using CBD and CBN together increased this effect.**

Our gluten-free, vegan **StarryNight Gummies** contain CBD, CBG & CBN, powerful plant-based ingredients that support your body and your sleep.

And not only that, but you'll rest easy knowing they're safe, pesticide free and made with love by Queen Hemp Company.

CULINARY HEMP: SATIVA SPICE & SATIVA RUB

Sativa Spice is a hemp garden mirepoix! Use it while cooking or as a finishing salt to create a fresh garden vegetable flavor in any dish. And our bold butcher blend, **Sativa Rub**, is perfect for sautéing, grilling and culinary fun! Lightly brush your protein with olive oil and generously rub the blend before roasting, broiling or grilling. It can also just be used as a finishing spice to your protein dish!
