

LEGALIZE MEDICAL MARIJUANA IN NORTH CAROLINA

SIGN AND SHARE THE PETITION TODAY!

THE STATE OF LEGALIZATION

"If it seems like a new state is legalizing cannabis nearly every week, don't worry, you're not high — states are indeed legalizing the drug at an unprecedented pace. The wave of green legislation doesn't seem like it's going to start ebbing anytime soon, either."

According to **this article in Rolling Stone** magazine, "there are now fewer states that have not legalized THC for either medicinal or recreational purposes." North Carolina is one of them. You can read more about legalization on page 2.

FINAL VOTE: NAME THAT STRAIN!

You've been submitting some **AWESOME** names for the **Name That Strain Challenge!!**

We've narrowed it down to the top 3 contenders... PLEASE HELP US DECIDE!!

When you cast your final vote you'll be entered to win a cool hemp backpack loaded with Queen Hemp Company goodies.

Click here to cast your final vote now! Voting will be open until September 30th. We'll choose the name and winner on October 1st!

SUPPORT MEDICAL MARIJUANA!

We are excited to announce that the Compassionate Care Bill (SB711) passed through the Senate committee recently, but there's still work to be done!

In short, the bill states the desire to support native North Carolinians. At Queen Hemp Company we ARE native North Carolinians, we employ veterans, and we believe in the compassionate use of medical marijuana. If you support it too, **sign the petition** and let's make our voices heard! **Click here** to sign it, and then share it with your friends!

NEW! COSMIC BERRY DELTA 8 NANO TECH WATER

Are you new to nanotechnology? Here's a little introduction into why size matters.

Making something "nano" means that it becomes smaller.

The receptors in your endocannabinoid system are pretty cool, but they can have a hard time accepting much more than 4% of the cannabinoids you consume. This is because cannabinoids don't always fit perfectly into your receptors.

Nanotechnology allows cannabinoids to become much smaller in size, which often means the product feels more potent. This is because it has been transformed into a form that is more utilizable

by your body. Essentially, when you use a nanoemulsion, your body absorbs roughly twice the amount it normally would, even at the same potency.

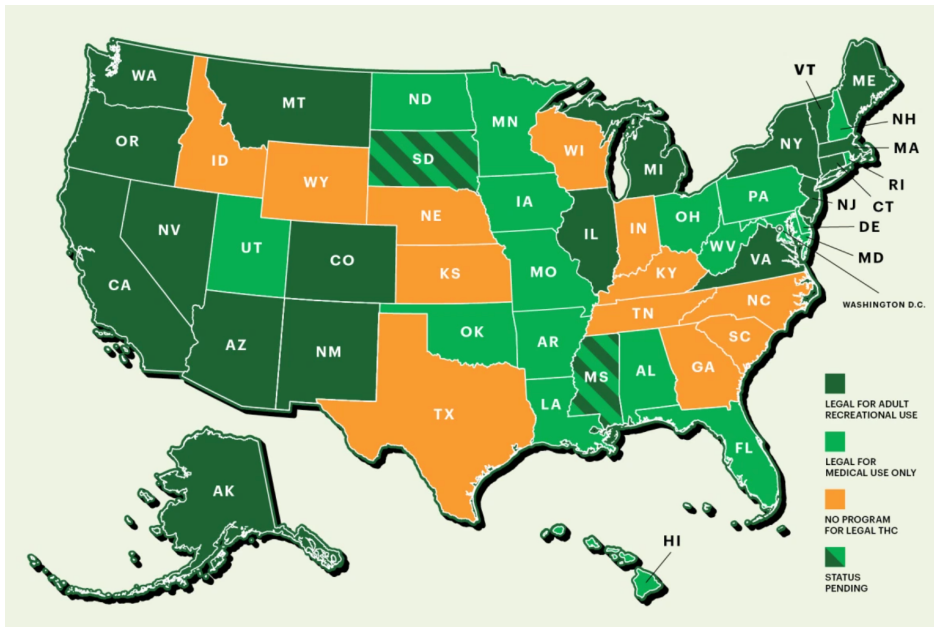

Cannabinoids are ~2000 nanometers. After nanoemulsion, the molecules are more spread out, which means that where there was once a large mass of this one cannabinoid, there are now many smaller masses of that same cannabinoid.

These smaller masses measure between 4 – 10 nanometers, which is nearly 500 times smaller than they were in their original state!

After nanoemulsion, these cannabinoids become hydrophilic, meaning they can be more readily mixed into water. And the human body is over 60% water, which means our **NEW Cosmic Berry Delta 8 THC Nano Tech Water** is ready for absorption by your body!

Since it's water soluble, there is no longer the need to place it under your tongue and hold it there for a substantial amount of time. All you have to do now is add to your favorite juice or water, and drink it! Expect delivery to your system in about half the time, and be aware that you may need a smaller dose than usual.

As always, please enjoy our Delta 8 products responsibly.

IN THE NEWS

Curious about the legal status of cannabis in the United States? You can learn more about state by state legalization in **this article**.

North Carolina is one of only 12 U.S. states that do NOT have a program for legal THC, even for compassionate medical use. We are, however, excited to announce that the Compassionate Care Bill (SB711) passed through the Senate committee recently, so it's in the works... but there's still work to be done!!

As co-owner Nicole Burnette explained recently, people are "tired of pharma and side effects, and they really do want plant-based wellness." Which is exactly why we started this petition to **Legalize Medical Marijuana in North Carolina**, and we're asking for your support! Please sign the petition, then share it with your friends and family, and on your social media pages too!

PRODUCT OF THE MONTH

DELTA 8 NANO TECH WATER

Our Cosmic Berry Nano Water Soluble Tincture has 600mg of Delta 8 THC per 1oz bottle or 20mg/ml.

Nanotechnology allows for 80-95% system absorption, due to the smaller particles, versus 5% -20% with an oil tincture, which means faster delivery to your system!
